

# Ensure OR efficiency and effectiveness

with NexxisCare

Operating rooms generate about 60% of hospital revenue. So the pressure to keep up with the latest technology, and adopting an agile framework, keeps increasing. Still, technology won't do the trick if it doesn't have a good support system.

## One solution tailored to all your needs

- Proactive maintenance
- Remote monitoring and troubleshooting
- Efficient asset management
- Faster issue resolution
- Safe and secure

## Your ORs and facilities, in the blink of an eye

With proactive maintenance, remote monitoring and troubleshooting, and asset management, NexxisCare supports your team in delivering their best performance. Get access to the latest software and security updates, and focus on what truly matters: elevating patient health and providing advanced care.

NexxisCare is definitely a must-have service. We were able to easily locate three critical fiber issues yesterday and cleared two of them for OR4.

## Reliable and efficient management of multiple ORs and facilities

NexxisCare has **unique fiber quality monitoring capabilities** to assure surgical video availability and indisputable reliability. Stay two steps ahead of any issue, and gain control in unpredictable situations with **heat monitoring** and a **video instability trend analysis**. If a problem still occurs, access NexxisCare remote diagnostics for a swift resolution.

## Assure uptime of your ORs

You'll get access to **your personalized cloud-based portal**, which enables you to solve issues faster thanks to remote monitoring and troubleshooting, wherever you are. You'll also always have access to the latest software updates.

## Expert efficiency

**Remote management** allows you to keep the OR up to date and ensure faster turn-around times. How? NexxisCare enables OR integrators to easily draw up reports on the quality of the ORs and their connected hospitals. In order to get the best out of your system, dedicated Barco experts can support and train you.

## Safe and secure

**Proactive maintenance** will assure the reliability of your ORs and lower unexpected costs and delayed interventions due to technical problems. The subscription model keeps your equipment current with the latest security updates at all times.
