

wePresent

Collaborative ManagementSuite

Enterprise system control management

Our Collaborative ManagementSuite (CMGS) is specifically designed for enterprise clients who need a robust solution for managing wePresent models in a large deployment environment.

Rest API

Utilizing Rest API, wePresent control system commands can be seamlessly integrated within your existing enterprise AV management software.

Seamlessly monitor, manage and diagnose wePresent presentation gateways from your current system's web interface or a touch panel.

Monitor your environment

Monitor the health and status of individual units from all your locations.

Update & configure

Power cycle, adjust settings and install firmware to one or multiple units remotely.

Schedule changes

Schedule and monitor status of updates and configurations deployed to units.

Reduce waste in IT

Save IT department manpower with more effective troubleshooting.

System requirements

- Operating System: Linux
- Processor: AMD64 or Intel 64 (AMD64 architecture)
- RAM: 2GB
- Hard Disc space: 32GB free
- Video memory: 4MB Minimum
- Video outputs: 1
- Network interfaces: 1
