

MIRROR HEAD

Dynamic Projection Institute

The 'Mirror Head' is a tool that helps you to align, move projection positions and create fascinating shows or installations with 3-chip DLP laser phosphor large venue projectors like the Barco UDX Series or with the single chip DLP F80 Series.

Supplier website: www.dynamicprojection.com

Compatibility:

- MH29 - BARCO 3-chip DLP laser projector UDX Series

The Mirror Head is an add-on for your projector. It is a high-tech digitally operated mirror that you mount to your projector to project content onto any surfaces (e.g. objects, walls, floors, ceiling).

- MH30 - BARCO single chip DLP laser projector F80 Series

It is important to note. – #TheMH29 and #MH30 have been designed and are produced in Austria to ensure a high-level of performance. Dynamic Projection Institute has designed this powerful tool to operate at industry-levels of efficiency and we guarantee accurate projection positioning.
