

5 reasons to consider G60

1.

Choose between 3 different brightness levels: 7K, 8K or 10K lumens; and be sure you get a qualitative and affordable entry-level projector with outstanding image quality assuring accurate Rec. 709 colors.

2.

With a maximum noise level of only 36 dB and a compact form factor, our black or white G60 units blend in perfectly in your architecture. The **user-friendly projector toolset software** allows you to easily control the settings of multiple projectors from one central point – even the ones installed on the ceiling.

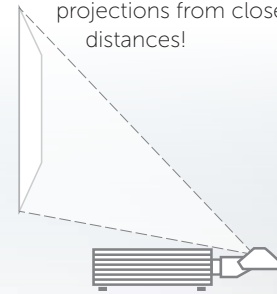

3.

Sustainability is high on the Barco agenda, we set the ambition to lower our environmental footprint and those of our customers. The G60 is an **eco-friendly product** with a low power stand-by mode of only 0,5W to reduce your power consumption!

4.

From 0.38:1 UST to 5.5:1 long throw. Our full interchangeable lens range offers ultimate installation flexibility even in the most compact set-ups and projections from close distances!

5.

Barco is a **trusted brand** and partner that gives you the support you want, when you really need it. Thanks to our standard product warranty and the additional **Essential-Care** service options you can receive priority treatment with reduced response times and get access to an existing pool of G60 swap units with comparable brightness and lifetime.
