## Make hybrid collaboration flow with one click

In today's hybrid workplace, with part of the people working in-office and others remote, video conferencing is the natural way of collaboration. And we prefer to start those video calls from our own laptop. Still, connecting people in-room and remote can be a real challenge.

No wonder, workers expect employers to invest in better facilities and technology, to enable this hybrid work model.

### 1/3

wants better video conferencing technologies as most desired investment\*

### 56%

prefer to host video calls from their laptop\*

### Frictions experienced in a hybrid meeting

#### Cable hassle or struggle with app settings

You don't know which cables to connect to quickly share content on the room display and/or which settings to change in your video conferencing app to use the room camera and speakers

#### Audio & video limitations

Remote participants can't see and hear everyone in the meeting room when you use the laptop's microphone and camera

#### People and content view

You can't always keep track of both people and content while hosting a hybrid meeting from a meeting room

#### Laptop limitations

When hosting a meeting from your laptop, your screen becomes visible to all in the meeting room. You can't take notes or search for additional info unnoticed

### The answer is ClickShare

Simple, easy, wireless. That's how you run better hybrid meetings from your laptop with ClickShare Conference. Smart meeting flows make your meetings intuitive and stress-free. In seconds you share your content wirelessly on the room display and connect to the camera and speakers in the room.

# ClickShare

Meeting participants want to simply walk into any meeting room with their own laptop and instantly, wirelessly connect to every aspect of the meeting room – camera, mic, speaker – regardless of manufacturer, brand and model.

Walk into the room, you immediately see if the room is available or booked. Automatically connect to the meeting room (**PresentSense**) ultrasound proximity detection or plug in a Button. No struggle with cables.

ClickShare automatically guides you as a host or participant (**HostFlow**). Enjoy impeccable audio & video quality in the video conferencing call thanks to easy connection to the meeting room mic & speakers and camera.

Start the meeting from your personal calendar with a single click (**One-Click-Join**). Share your presentation, keep track of remote participant's video, side by side (**ConferenceView**).

Share full screen or application window, while keeping your laptop screen private for note taking. When you end the call, the meeting room becomes a digital signage display.

## Discover ClickShare Conference

### HOST FROM LAPTOP

All it takes is one click to wirelessly start a video meeting from your laptop with any UC&C solution. Switch platforms easily. Enjoy the same consistent user experience with the ClickShare Button or App, even when with guests.
