

Host truly collaborative meetings

Welcoming a hybrid workforce in the office, brings new challenges for businesses to introduce more meeting equality in video-enabled meetings. Especially remote employees feel less engaged and involved than their on-site colleagues.

With the right tech at the heart of any hybrid meeting space, organizations can make sure everyone gets a seat at the virtual table and has an equal share of voice, no matter where they are.

To help you keep control and raise the level of meeting engagement for both in-room and remote participants an advanced set of interactivity features is at your fingertips with ClickShare, the agnostic, wireless room system. Make hybrid collaboration truly flow with only one click.

find it hard to get noticed

Touch back support

Presenters control their laptop via the touch screen in the room

As a presenter, you can control any application on your laptop via the touch screen in the meeting room, instead of using your computer mouse.

With this advanced feature, ClickShare adds energy to meetings and leads the way to more innovative ways of collaboration.

Impress, convince, focus!

Available on C-10, CX-30 and CX-50

ClickShare

Blackboarding

Meeting participants use the meeting room's touch screen as a writing board

You can use the touch screen to write or sketch your ideas on the meeting room touch screen

Save your brainstorming session with one tap on the screen

Share a copy with all meeting participants connected to the ClickShare via the ClickShare Button or App

Available on C-10, CX-30 and CX-50

Annotation

Meeting participants add comments directly on the meeting room's touch screen

You can use the touch screen to write or sketch your ideas on the meeting room touch screen

Save your brainstorming session with one tap on the screen

Share a copy with all meeting participants connected to the ClickShare via the ClickShare Button or App

Available on C-10, CX-30 and CX-50

What's unique about interactivity features on touch-enabled displays?

- Easy and fast access to content and applications via the meeting room screen
- Direct interaction between user and content
- Intuitive experience
- Makes multitasking in meetings possible
- Assistive technology

Why use interactivity features in your meetings?

- Present more freely within the meeting space
- Ideate on content real-time
- Collaborate more interactive and creatively
- Get higher engagement from the participants
- Don't let the technical limitations of the room hinder the meeting flow
- Share notes easier afterwards
- Improve meeting outcomes and increase ROI of meetings
